

To Parents/Providers/Physicians:

Attached is the Arc's PRN Medication List. This includes commonly used-over-the-counter medications that are provided by the Arc. PRNs are medications that are only given "as needed" for the relief of temporary symptoms. These may be medications such as Tylenol for headache or fever, Milk of Magnesia for constipation or upset stomach, or Neosporin ointment for minor cuts and scrapes.

All medications found on this list are kept in stock. Any PRN medications ordered for the participant NOT on the list must be brought to the Arc, labeled properly and must be accompanied by a Physician's order. This form is to be **filled out completely by the physician and by the parent or provider.** The Arc's PRN Medication List is good for **one year** from the date signed by the physician. This order must be in place before we will assist in dispensing any medication to the individual it is listed on this form; **NO EXCEPTIONS.** If there is a medication you do not want them to receive you may put a line through it.

The Arc is committed to ensuring the personal growth and life enrichment of individuals with intellectual and developmental disabilities. Thank you for assisting us with that goal by making certain necessary medications available to be dispensed by The Arc in a safe and proper manner.

If you have any questions please feel free to reach me at the Arc (210) 490-4300 ext. 138 or at jcalvert@arc-sa.org

Sincerely,
The Arc Nurse
Jeanne Calvert BSN,RN,CCN
